Seeking: internship under La Salle's university-company agreement

Profile

Fourth-year Business Intelligence & Data Analytics student with a hybrid business-technical profile: understanding a business problem, translating it into a technical solution and shipping it. That is what I do as a freelance developer for real clients and as co-founder of an AI-powered iOS app. Seeking an internship in data or AI.

Experience

Freelance Developer — Business & AI Solutions

2026 – present

Clients: Consultoria Sostenible · ACAPPS (Catalan federation for people with hearing loss)

- **“Renda 2025” CRM (Consultoria Sostenible):** Microsoft-native CRM (Power Apps, Power Automate, SharePoint) running a full tax season for a 250+ client advisory — live campaign dashboard, email tracking with overdue filters and one-click automated invoicing, with zero new subscriptions.
- **Common Voice for ACAPPS:** adaptation of Mozilla’s open-source voice-dataset platform (React, Node.js, MySQL) to collect and validate Catalan speech from people with hearing loss — accessibility-focused UI and a custom sentence corpus for inclusive speech-recognition datasets.

Co-founder, WRDB

Aug 2025 – present

iOS virtual-wardrobe app with an AI stylist, live in beta (TestFlight) — wrdb.site

- Responsible for data and ML in a 3-founder team.
- Outfit recommendation engine (weather-, calendar- and preference-based), garment analysis with computer vision, and product analytics driving iteration on user feedback.
- AI-first workflow: Claude Code with MCP integrations across the stack, and LLM pipelines for garment analysis and flatlay generation.

Co-founder, DHM Middleman

Oct 2024 – Feb 2025

- Client acquisition and sales for small businesses: cold calling, sales funnels and delivery of simple, high-impact solutions.

Waiter, La Pallaresa · Sant Lluís SA

Apr–Sep 2024 · Jan–Apr 2026

Education

BSc in Business Intelligence & Data Analytics, La Salle BCN

expected Jul 2027

- Honors: 1st place, E-Business course — MEALPRINT, an AI app concept that scans meals and estimates their carbon footprint in real time.
- Coursework highlight: logistics carrier analysis (1P vs 3P) across ~525K packages — Tableau dashboards and executive report.
- International programs: UESTC (Chengdu, China) — Machine Learning & Business Intelligence course, Jun 2025.

Projects

- **Valorant Match Predictor:** end-to-end ML pipeline — custom vlr.gg scraper (CLI, CSV/Excel export), temporal and team-chemistry features, and classifiers predicting professional match outcomes. Python.
- **Polymarket Arbitrage Bot:** automated passive-arbitrage bot exploiting cent spreads on prediction markets, with market-data fetching and news scraping. Python.
- **buildcloud.site:** web product conceived, built and launched in 48 hours at Hacker House Barcelona (V3V Ventures / Lost Astronaut); hands-on go-to-market, positioning and distribution.
- More repositories: github.com/wyndollin

Technical skills

Languages: SQL, Python, R, Swift/SwiftUI

BI & analytics: Power BI, Tableau, Excel, Pandas, data preprocessing, predictive modeling, clustering, data visualization

Power Platform: Power Apps, Power Automate, SharePoint

Applied AI: machine learning, computer vision, Claude Code / LLM tooling

Languages

Spanish: native · **Catalan:** native · **English:** professional proficiency

Volunteering

Sant Jordi 2026 campaign volunteer, Fundació Comtal

Jan – Apr 2026

Handmade fabric roses sold to companies to raise funds for people in vulnerable situations.
